

Liam Wilson - Quantitative Developer & Python Financial Modeler
Email: liam.wilson@example.com | Location: Chicago, IL

Professional Summary:

Quantitative finance developer with 7 years building high-speed mathematical modeling engines in Python. Expertise in algorithmic trading systems, stochastic calculus, Monte Carlo simulations, and numerical Python libraries.

Experience:

- Senior Quantitative Developer at Quantum Capital Partners (2019 - Present)
 - * Implemented parallel Monte Carlo risk engine in Python with NumPy and Numba running 10x faster.
 - * Designed automated backtesting framework in Python processing multi-asset historical tick data.
- Quantitative Research Associate at AlphaEdge Analytics (2015 - 2019)
 - * Formulated statistical arbitrage and mean-reversion trading algorithms using Python and Pandas.
 - * Integrated C extensions with Cython to accelerate critical pricing loops.

Core Technologies:

Python, NumPy, SciPy, Pandas, Numba, Cython, Polars, Statsmodels, Jupyter, C++, Linux.
