

Sophia Alvarez - Generative AI & NLP Research Scientist
Email: sophia.alvarez@example.com | Location: Palo Alto, CA

Professional Summary:

AI researcher with 6+ years using Python for natural language processing and generative language models. Extensive experience fine-tuning LLMs with PyTorch, building RAG systems with LangChain, and vector embeddings.

Experience:

- Senior AI Scientist at Cognitive DeepLab (2021 - Present)
 - * Built production Python RAG pipeline with LlamaIndex, LangChain, and Qdrant vector database.
 - * Fine-tuned open-source LLMs using PyTorch and Hugging Face PEFT/LoRA, reducing hallucination by 40%.
- NLP Engineer at TensorWave AI (2018 - 2021)
 - * Developed custom Python NLP pipelines for semantic search and intent classification using spaCy.
 - * Scaled model inference on multi-GPU clusters using Ray and Triton.

Python & AI Skills:

Python, PyTorch, Hugging Face, LangChain, LlamaIndex, NumPy, Pandas, Scikit-Learn, ChromaDB, FastAPI.
